

Big Bat technical sheet

- 1 table 140 x 70 minimum
- 1 table 160 x 70 minimum
- 2 chairs

- We use a small compressor (25 x 25cm) which is not very noisy but it cannot be placed in the room. We have around thirty meters of tube.

Is there a room or storage room, if possible not resonant, adjoining the room? Need for passage space for the tube (flexible, 1 cm in diameter) under the door, or sufficient distance between the room and the compressor.

Sound:

- 2 small studio speakers on stands, 2 cables (xlr personal console outputs).

- 3h30 installation, 2h dismantling.
